MACROECONOMIC OUTLOOK

Export Targets

FARAWAY COUNTRIES STRATEGY

Why Faraway Countries?

- About two-thirds of Türkiye's total exports go to countries that are relatively close to Türkiye.
- Türkiye's average export distance remains below the world average.
- Distant countries account for 62% of the world's population and contribute to 64% of global GDP.
- With the Faraway Countries Strategy, we aim to increase our exports to 18 countries, which were around USD 20 billion on average between 2018 and 2020, to USD 50 Billion in 2028 and to increase our share in the imports of these countries to 1 percent.

Increasing Türkiye's share in world trade

It's recognized that our country has the potential to capture a significant portion of major markets that are geographically distant and have high incomes.

Diversifying export markets

The tendency of our exporters to geographically distant and major markets will contribute significantly to diversification of our export markets.

Guidance to exporters

A guiding strategy document has been released to extend Türkiye's average export to the global average of 4,744 km, and also to gain a foothold in distant major markets.

FARAWAY COUNTRIES STRATEGY

Goods and Services as Complementary Elements

- Within the context of the Faraway Countries Strategy, trade in goods and services is viewed as complementary elements. The significance of the services sector on the global economy and its impact on exports of goods grows annually.

- These points indicate that policies for the trade of goods and services should be considered inseparable and approached with a holistic view.
