Türkiye's Exports Up 2.3% To \$24B in October, Hitting Record High

Country achieved its highest October exports and set a new record over last 12 months, says Prof. Dr. Ömer Bolat

Türkiye's exports totaled \$24 billion, up 2.3% year-on-year in October, hitting a record high, the Turkish trade minister announced. In a news conference in Istanbul, Bolat said the country achieved its highest October exports and set a new record with exports reaching \$270.2 billion over the last 12 months, he explained. During the first 10 months of the year, the country's exports also amounted to \$224.6 billion, rising 3.9% year-on-year.

Türkiye's Industrial Sector Sees New Export Record For January–September

Türkiye's industrial sector records highest-ever exports for January–September period at \$143.2billion, up 5.7%, accounting for 71.4% of Türkiye's total exports

Türkiye's industrial sector achieved its highest-ever first-nine-month exports, totaling \$143.2 billion in January–September this year, according to data from the Türkiye Exporters' Assembly (TİM). Global agreements and sectoral trade meetings also contributed to the rise in exports.

Türkiye's total exports climbed 4.1% to \$200.6 billion in the first nine months of the year, the data showed. Industrial exports surged 5.7% accounting for 71.4% of total exports. Six of the 15 industrial sub-sectors broke export records during this period. The automotive industry's exports reached \$30.2 billion, followed by electrical and electronics with \$12.9 billion, jewelry with \$6.2 billion, defense and aerospace with \$6 billion, air conditioning with \$5.4 billion, and ships, yachts, and related services with \$1.5 billion. In terms of growth rates, defense and aerospace exports surged 39.3%, jewelry 14.3%, automotive 12.3%, ships, yachts, and services 8.7%, electrical and electronics 5.7%, and air conditioning 3.2%.

Germany was the top destination for Turkish automotive exports at \$4.9 billion, and also imported \$571.7 million in air conditioning products. Norway received \$264.6 million in shipbuilding and services exports, the UK imported \$1.3 billion in electrical and electronic goods, and the United Arab Emirates purchased \$2.3 billion in Turkish jewelry.

Türkiye, Jordan Ink Joint Economic Commission Deal

Türkiye–Jordan Joint Economic Commission involves many cooperation areas, ranging from trade to mutual investments

Türkiye and Jordan signed a memorandum of understanding at the Türkiye–Jordan Joint Economic Commission (JEC) meeting in Amman, with the participation of Turkish and Jordanian trade ministers. Turkish Trade Minister Prof. Dr. Ömer Bolat said at the event that the JEC meeting marks a watershed moment in the two countries' bilateral relations in trade, investments, infrastructure, contracting, agriculture, health, culture, tourism, and other fields, with the signing of the first joint economic commission.

Bolat pointed out that during bilateral meetings, both the Turkish and Jordanian sides agreed to develop new projects and programs for cooperation in key areas. Turkish and Jordanian businesspeople, as well as the Foreign Economic Relations Board (DEİK), held a roundtable meeting as a part of Bolat's visit, while the business communities of the two countries will come together for a forum sometime in the future. "We will sign many agreements on cooperation in free zones, small and medium-sized enterprises (SMEs), organized industrial zones, standardization, education, health and scientific research, and agriculture," he said.

The Turkish-Jordan trade volume reached nearly \$1.5 billion between January and September, indicating rapidly growing trade relations based on a win-win approach, he added. He noted that Türkiye and Jordan, as well as their respective private sectors, support cooperating on the reconstruction of Syria, the Gaza Strip, and the West Bank. Bolat said the historic transportation corridor between Syria and Jordan would boost transport and trade from Europe to the Gulf via Türkiye, Syria, and Jordan, and then back to Europe.

Turkish President Arrives in Azerbaijan For Turkic States Summit

Recep Tayyip Erdoğan joins leaders in city of Gabala to attend 12th Organization of Turkic States Summit with the theme 'Regional Peace and Security'

Turkish President Recep Tayyip Erdoğan arrived in the Azerbaijani city of Gabala aboard the presidential aircraft to attend the 12th Summit of the Organization of Turkic States (OTS). The President Recep Tayyip Erdoğan addressed participants during the summit, held under the theme "Regional Peace and Security".

Türkiye Inks 2 New Deals with Libya on Contracting, New-Era Projects

Both countries also agree to organize Türkiye-Libya Investment and Business Forum, hold 22nd meeting of Türkiye-Libya Joint Economic Commission in Tripoli in December

Türkiye and Libya signed two new memoranda of understanding (MoUs) on contracting receivables and new-era projects, the Turkish Trade Ministry announced. The deals were signed by Turkish Trade Minister Prof. Dr. Ömer Bolat, and his Libyan counterpart Muhammad al-Huwayj and Libyan Transport Minister Muhammad Salem Al-Shahoubi on the sidelines of the 5th Türkiye-Africa Business and Economic Forum in Istanbul.

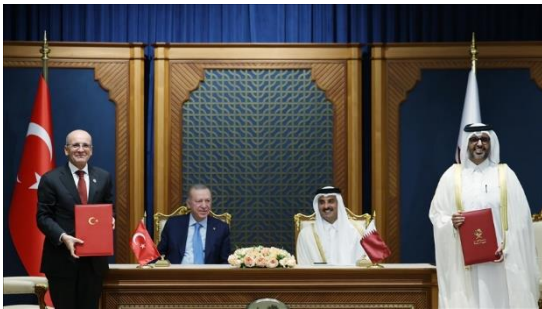

"The Memorandum of Understanding signed in the field of contracting is important for the follow-up of our contractors' receivables in Libya, as it is a continuation of the meeting between the delegations held in Ankara last September," the ministry said in a statement. It added that the deal marks the beginning of a new era for Turkish contractors to contribute to Libya's development by undertaking new projects. The ministers emphasized their mutual commitment to increasing trade with Libya, which reached \$3.7 billion by 2024, and to increasing Turkish contractors' business volume in the country. Sectors such as hydrocarbons, renewable energy, mining, customs, banking, and healthcare were considered potential areas for cooperation.

The statement said that the most important outcomes of the meeting were the decisions to organize the Türkiye-Libya Investment and Business Forum and to hold the 22nd meeting of the Türkiye-Libya Joint Economic Commission (KEK) in Tripoli on Dec. 16-17. The ministers also signed the Joint Declaration on the Establishment of the Joint Economic and Trade Commission (JETCO) and the minutes of the second meeting of the Türkiye-Libya Joint Working Group. "Both texts constitute a roadmap for subsequent work," the readout said.

Türkiye, Qatar Sign Joint Declaration, Agreements on Defense, Trade, Strategic Cooperation

Turkish President Erdoğan and Qatar's Emir Al Thani witness signing of several agreements between 2 countries after they co-chaired 11th Meeting of the High Strategic Committee in Doha

Türkiye and Qatar signed a series of agreements and a joint declaration as part of the 11th Meeting of the Türkiye-Qatar High Strategic Committee. Turkish President Recep Tayyip Erdoğan and Qatar's Emir Tamim bin Hamad Al Thani witnessed the signing of several agreements between the two countries after they co-chaired the 11th Meeting of the High Strategic Committee in Doha.

Earlier, the two leaders met one-on-one and held inter-delegation talks at the Emir's Diwan. "Joint Declaration on the 11th Meeting of the High Strategic Committee between the Republic of Türkiye and the State of Qatar" was signed by Turkish Foreign Minister Hakan Fidan and Qatari Prime Minister and

Foreign Minister Sheikh Mohammed bin Abdulrahman Al Thani. “Memorandum of Understanding between the Presidency of Strategy and Budget of the Republic of Türkiye and the Government of the State of Qatar on Cooperation and Experience Sharing in Various Areas of Strategic Development Planning” was signed by Turkish Treasury and Finance Minister Mehmet Şimşek, Trade Minister Prof. Dr. Ömer Bolat, and Secretary-General of Qatar’s National Planning Council Abdulaziz bin Nasser Al Khalifa.

“Joint Ministerial Statement between the Ministry of Trade of the Republic of Türkiye and the Ministry of Commerce and Industry of the State of Qatar” was signed by Trade Minister Prof Dr. Ömer Bolat and Qatari Minister of Commerce and Industry Sheikh Faisal bin Thani Al Thani. “Memorandum of Understanding on Cooperation in the Field of Defense Industry” was signed by President of Türkiye’s Defense Industry Agency Haluk Görgün and Qatari Deputy Prime Minister and Minister of State for Defense Affairs Sheikh Saud bin Abdulrahman bin Hassan bin Ali Al Thani.

5th Türkiye-Africa Business and Economic Forum Kicks Off in Istanbul

Addressing the 5th Türkiye-Africa Business and Economic Forum, President Erdoğan said: “With its rapidly growing economy and rapidly improving investment climate as well as its location right at the intersection of three continents, Türkiye’s doors are wide open to all investors and entrepreneurs from across the world. Relevant institutions and ministries of our state, as well as the Investment and Finance Office, affiliated with the Presidency, stand ready to provide the necessary support to anyone wishing to invest in our country with their minds at peace.”

The fifth Türkiye-Africa Business and Economic Forum (TABEF) opened in Istanbul, organized by the Foreign Economic Relations Board (DEİK) with the African Union (AU) and hosted by the Turkish Trade Ministry.

The forum is being held this year under the theme "Leveraging Türkiye-Africa Relations for Mutual Gains."

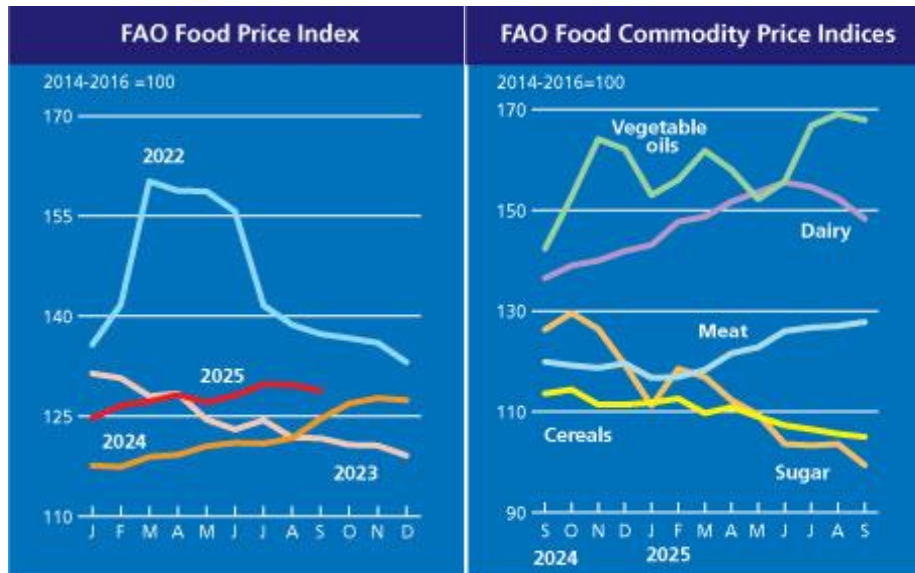

Key sectors at the TABEF include agriculture and food, renewable energy, mining, automotive, textiles, transport and logistics, construction, defense, and digital technologies. Over the two-day forum, panels could explore themes such as competitive and collaborative textile value chains, financing Africa’s infrastructure needs, pharmaceuticals and medical supplies, Türkiye-Africa logistics hub, women’s leadership and entrepreneurship, food security, energy and mining, civil aviation cooperation, and digital trade and manufacturing.

SECTORS

FAO Food Price Index Down in September, Led by Dairy and Sugar

The FAO Food Price Index (FFPI) averaged 128.8 points in September 2025, down slightly from its revised August level of 129.7 points. Declines in the cereal, dairy, sugar, and vegetable oil indices outweighed an increase in the meat index. Overall, the FFPI was 4.2 points (3.4 percent) higher than in September 2024 but remained 31.4 points (19.6 percent) below its peak reached in March 2022.

The FAO Cereal Price Index averaged 105.0 points in September, down 0.6 points (0.6 percent) from August and 8.5 points (7.5 percent) below its September 2024 level. World wheat prices declined for the third consecutive month in September, largely due to subdued international demand and confirmation of large harvests in the Russian Federation and other key producing countries in Europe and Northern America. Maize prices also dropped, on forecasts of abundant supplies in exporting countries Brazil and the United States of America, while the temporary suspension of grain export taxes in Argentina also weighed on maize quotations. Among other coarse grains, world prices of both barley and sorghum rose, with barley prices recording a third consecutive monthly increase. Meanwhile, the FAO All Rice Price Index fell by 0.5 percent in September 2025 led by declines in Indica quotations, as ample exportable supplies and reduced purchase orders by buyers in the Philippines and Africa weighed on the market.

The FAO Vegetable Oil Price Index averaged 167.9 points in September, down 1.2 points (0.7 percent) from August but still 25.0 points (18.0 percent) above its year-earlier level. The decline mainly reflected lower palm and soybean oil quotations, more than offsetting increases in sunflower and rapeseed oil prices. International palm oil prices decreased slightly, largely due to higher-than-expected August stocks reported in Malaysia – reaching a 20-month high, offsetting the impact of strong global import demand. Global soybean prices declined for the second consecutive month, pressured by elevated supplies from Argentina following temporary suspension of export taxes on soybeans and derived products in late September. By contrast, quotations of sunflower and rapeseed oils continued to increase, reflecting, respectively, lingering supply tightness in the Black Sea region and in Europe.

The FAO Meat Price Index averaged 127.8 points in September, up 0.9 points (0.7 percent) from its revised August level and 7.9 points (6.6 percent) from a year earlier, reaching a new record high. The increase reflected higher world bovine and ovine meat prices, while pig and poultry meat quotations

remained broadly stable. Bovine meat prices climbed to an all-time high, supported by strong demand in the United States of America, where limited domestic supplies and favourable price differential continued to encourage imports, especially from Australia, where prices rose. Brazilian bovine prices increased as well, underpinned by robust global demand, offsetting reduced access to the United States of America following the imposition of higher tariffs. World ovine meat quotations surged on the back of solid global import demand amid limited export availability from Oceania. Pig meat prices were steady, as firmer demand for Brazilian pig meat from alternative markets offset reduced purchases by China. In the European Union, the impact of new tariffs imposed by China on pig meat export prices remained limited. Poultry meat quotations remained firm, reflecting relatively balanced global markets, despite import restrictions related to localized outbreaks of high pathogenicity avian influenza.

The FAO Dairy Price Index averaged 148.3 points in September 2025, marking its third consecutive monthly decline, down 2.6 percent from August while remaining nearly 9 percent above its level a year earlier. All sub-indices eased, with butter falling by 7.0 percent, skim milk powder by 4.3 percent, and whole milk powder by 3.1 percent, while cheese quotations eased only slightly. The relatively sharp drop in butter prices reflected a seasonal increase in cream availability as demand for ice-cream in the Northern Hemisphere waned, alongside higher production expectations in New Zealand as the spring flush advances. Nevertheless, despite this fall, butter prices remained 6.3 percent above the 2024 average. Milk powder quotations decreased mainly on softer demand from key importers and firmer export competition. By contrast, cheese prices declined only marginally, as a modest easing in the European Union amid steady output and softer export interest was partly offset by firmer quotations in Oceania, where smaller early-season supplies and stronger demand from Asian buyers supported New Zealand prices.

The FAO Sugar Price Index averaged 99.4 points in September, down 4.2 points (4.1 percent) from August and as much as 26.9 points (21.3 percent) from a year ago, reaching its lowest level since March 2021 (96.2 points). The drop was driven by higher-than-expected sugar production in Brazil, resulting from large crushing volumes and increased use of sugarcane for sugar production in key southern growing regions. Additional downward pressure on prices came from favourable harvest prospects in India and Thailand, following ample monsoon rains, combined with expanded plantings.

Türkiye Innovation Week 2025 Kicks Off in İstanbul

This year's program covers topics ranging from artificial intelligence, production, education, to defense industry

Türkiye Innovation Week 2025, the country's largest innovation event, kicked off at İstanbul's Halic Congress Center under the theme "Tomorrow: Now." Organized by the Turkish Exporters Assembly (TIM) with the support of the Turkish Trade Ministry, the three-day event brings together academics, senior executives, pioneering entrepreneurs, and innovation leaders from around the world.

This year's program covers a wide range of topics in the age of artificial intelligence, from production and education to law and the defense industry. Speaking at the event, Trade Minister Prof. Dr. Ömer Bolat described the event as "a very successful organization." "I hope this event, which has attracted nearly 20,000 innovation enthusiasts, will be very productive. The program is rich, featuring highly valuable speakers and important topics, and the young audience is showing great interest. I sincerely believe that it will yield very positive and successful outcomes for our country and our economy."

The event has featured panels, masterclasses, digital art exhibitions, experience areas, and networking opportunities. Participants can also follow the sessions through a mobile app that offers an AI-based recommendation system, personalized schedules, and interactive features. Among the highlights, artist Refik Anadol's work "Sense of Healing" was being exhibited at the event. Created with brain-data visuals, the digital sculpture offers a multi-sensory healing experience. More than 20 exhibitions and installations combining technology and art were on display, including digital art, VR experiences, wearable technology, and AI-driven cinema.

World Halal Summit, Halal Expo to Offer Opportunities to Boost Trade

Country business forums for Oman, Yemen, Tunisia, Palestine, to be organized as part of World Halal Summit in Istanbul this month

The World Halal Summit and Halal Expo, to be held in Istanbul, wants to build new bridges to boost trade and commercial diplomacy with country business forums and business-to-business (B2B) sessions. Under the patronage of the Turkish Presidency, with the partnership of the Islamic Cooperation Organization, the four-day event will be held at the Istanbul Fair Center from Nov. 26- 29.

B2B meetings, which offer small and medium-sized enterprises (SMEs) in particular the opportunity to enter global markets, enable manufacturers to promote their products and expand their export networks, while facilitating the spread of exports and accelerating branding processes. Country business forums will also play a critical role in increasing direct foreign investment, while international investors get to know the investment potential of countries more closely through presentations and success stories at the forums. The environment strengthens the perception of countries as investable, providing sustainable contributions in terms of employment, technology transfer and production capacity, while the organizations also pave the way for scientific, technological and sectoral collaborations beyond commercial relations.

Joint projects developed in health, tourism, energy, digital transformation, agriculture and construction increase countries' innovation power and competitive capacity. The meetings also reinforce countries' brand value and perception of trust, making their production capabilities and economic power more visible on the international stage through country pavilions, promotional events and media coverage. The event will feature the Oman Business Forum, the Yemen Business Forum, the Tunisia Business Forum and the Palestine Business Forum with high-level participation from the related countries. Country business forums and B2B organizations, which have become one of the most dynamic meeting points for international trade, contribute significantly to the economic growth, foreign trade and investment ecosystem of countries. The platforms facilitate not only commercial

relations between companies but also strengthen economic diplomacy between countries. Furthermore, business forums increase the volume of mutual trade between countries while supporting the flow of technology, services, information and investment. In this way, business representatives, investors and public institutions come together under one roof to lay the foundations for new business collaborations and long-term partnerships.

The World Halal Summit, which welcomed more than 50,000 visitors last year, was attended by over 500 participants, over 50 participating countries, and over 100 visiting countries.
